CLASS SPECIFICATION

LABORATORY ANALYST

Deleted: SENIOR

Deleted: TECHNICIAN

FLSA STATUS:

Non-Exempt

CLASS SUMMARY:

The Laboratory Analyst is the third level in a four level Utilities Laboratory series. In addition to performing standardized analyses, incumbents are responsible for performing more complex chemical and bacteriological analyses, maintaining instrumentation, monitoring compliance with quality assurance standards, and preparing reagents and media, ensuring precision and accuracy of results.

The Laboratory Analyst is distinguished from the Laboratory Technician by its responsibility for performing more advance and complex analyses. The Laboratory Analyst is distinguished from the Senior Laboratory Specialist, which is responsible for performing advanced environmental analyses using sophisticated instrumental techniques and/or lead worker duties.

Training and Experience (positions in this class typically require):

- Bachelor's Degree in Chemistry, Biochemistry, Biology or a natural or physical science, and two years of experience as a Laboratory Technician, in an environmental laboratory for testing of water and wastewater;
- OR
- An equivalent combination of education and experience sufficient to successfully perform the essential duties of the job such as those listed above.

Deleted: hree

Licensing Requirements (positions in this class typically require):

- Basic Class C License
- California Water Environment Association Grade II Laboratory Analyst Certification

Knowledge (position requirements at entry):

Knowledge of:

- Quality control and quality assurance practices associated with a laboratory;
- Organic and inorganic chemistry principles;
- Biological techniques;
- Equipment sterilization practices;
- Modern laboratory techniques and procedures as related to the analysis of environmental samples;
- Mathematical concepts;
- Statistical analysis, theories and concepts;
- Applicable equipment utilized in a laboratory setting;
- Recordkeeping principles and practices;
- Data collection and analysis techniques;
- total organic carbon and UV/visible spectrophotometry techniques;
- Applicable computer software packages;
- Handling acids and other hazardous chemicals;
- Safe work practices and procedures.

CLASS SPECIFICATION**

LABORATORY ANALYST

Deleted: SENIOR

Deleted: TECHNICIAN

Skills (position requirements at entry):

Skill in:

- Prioritize and assigning work; detail oriented and ability to multi-task*
- Training employees in proper work methods
- Analyzing a variety of samples in a laboratory setting
- Performing a variety of scientific tests and analyses
- Safely operating and maintaining applicable tools and equipment
- Evaluating data utilizing established guidelines
- Preparing and performing mathematical calculations
- Communication, interpersonal skills as applied to interaction with coworkers, supervisor, the general public, business, organizations, elected and appointed officials, media, etc. sufficient to exchange or convey information, give/receive work direction

Physical Requirements:

Positions in this class typically require: feeling, finger dexterity, grasping, hearing, repetitive motions, seeing, talking, bending, kneeling, lifting, reaching, standing, stooping, walking, balancing, climbing, crawling and crouching.

Medium Work: Exerting up to 50 pounds of force occasionally, and/or up to 20 pounds of force frequently, and/or up to 10 pounds of force constantly to move objects.

Incumbents may be subjected to moving mechanical parts, electrical hazards, vibrations, fumes, odors, dusts, poor ventilation, adverse weather conditions, environmental hazards, gasses, chemicals and oils.

Note:

The above job description is intended to represent only the key areas of responsibilities; specific position assignments will vary depending on the business needs of the department.
